RESEARCH

Power-system modeling and stability, renewable-energy integration, physics-informed and self-calibrating digital twins, real-time parameter estimation of inverter-based resources, machine learning for power-system monitoring and resilience, and intelligent grid control.

EDUCATION

American International University-Bangladesh — Dhaka, Bangladesh
B.Sc. in Electrical and Electronic Engineering — Jan 2022 – Dec 2025
Final grade: 3.57/4.00 | Credits: 148

PROJECTS

AI-Based Motion Detection Edge Computing System Apr 2024 – May 2025

- Designed an intelligent edge computing system that captures and processes images using computer vision algorithms to detect motion through sequential frame analysis.
- Implemented AI-based classification on captured images to identify motion events and trigger automated responses.
- Integrated an AI camera module with Raspberry Pi 5 and a vision kit for complete on-device processing without cloud dependency.
- Optimized the image-capture pipeline and motion-detection algorithms for low-latency performance on edge hardware.

WORK

Energypac Engineering Ltd. Dhaka, Bangladesh
Internship Trainee Jun 2025 – Jul 2025

- Gained hands-on experience in the manufacturing and testing of power equipment including transformers, switchgear, and protective devices.
- Assisted with equipment assembly, relay settings, and quality inspections.
- Participated in high-voltage testing procedures in accordance with IEC standards.
- Supported testing and commissioning activities for power distribution equipment.

SKILLS

Programming & Data Tools: C, C++, Python, NumPy, Pandas, SciPy, Matplotlib, Seaborn, TensorFlow, PyTorch, Scikit-learn, Git/GitHub, OpenCV, MATLAB & Simulink, Visual Studio Code, Google Colab

Documentation & Typesetting: LaTeX (Intermediate), Overleaf, Microsoft Office

Hardware Design, Circuits & PCB: EasyEDA, NI Multisim, Proteus

EDA, IC & CAD Tools: Cadence Virtuoso, AutoCAD, AutoCAD Electrical, SOLIDWORKS

Simulation, RF/EM & Optics: CST Microwave Studio, Antenna Design, OptiSystem

Graphic Design & Illustration: Inkscape, CorelDRAW

Energy Systems: Renewable Energy, HOMER Energy, RETScreen, PSCAD, PSS/E, DIgSILENT PowerFactory

Embedded Systems: Raspberry Pi 5, ESP32, Arduino Uno, AI Vision Kit, Motion Sensors

Professional Skills: Research Skills, Problem Solving, Team Leadership, Project Management, Presentations, Marketing
